

## MEMORANDUM

**DATE:** October 5, 2017  
**TO:** Technology Staff  
**FROM:** Pearson Education  
**RE:** iOS Requirements

*The TestNav Technology Requirements page defines the minimum requirement for testing. Pearson Education tests the newest Operating Systems as they are released from vendors, including both dev and beta versions.*

*Once the stable version is released, Pearson Education tests and adds it to the support page. Pearson Education is not holding or restricting updates; the acceptance and support of new versions is dependent on when the stable versions are released and if all testing is complete. The requirements define the minimum version required and not the only versions Pearson Education will support.*

*Please understand that Pearson Education is working to support iOS11, but must ensure issues identified, potentially impacting test security, are resolved prior to formal confirmation. We are committed to collaborating with the Department to find a solution.*
